Capitalism is crashed

Neo-system the masses want

Bravo, Bravo to you. It is exactly true, the Capitalism is crashed. we need a new system. the current system creates many many problems and difficulties for the 99% and bring everything for the 1%.

Capitalism damages the workers, Capitalism damages the farmers, Capitalism damages all the employees. it damages children, it damages women and all the olds and the youngs who are from 99% not from 1%.

The current system is not our system, we the members of the working class are going to break this unjust and unfair system. The current system is their system, they the members of the ruling class are trying to keep this tyrannous system. Because this system bring them the wealth and the income from our houses, from our pockets, from our energies and even from our red blood.

But, we crush the system more and more and sweep all its supporters by force. Our arms are strong enough to break the capitalism and build a new system. Because we gathered all with each others and going to organize ourselves much more for the next time which is not certainly far.

The bank lords, the land lords, the war lords and the other lords are going to be swept from the earth by the masses revolution under the leadership of revolutionary parties and organizations against capitalism and its high phase imperialism.

The youngs in England and the youngs in Italy have done the appropriate confrontation with capitalism and Fascism.

Changing the system is not doable by doing demonstration in peace. Changing the system from the old one to the new one is doable only by force.

Then, the youngs in England and the youngs in Italy have done the right actions. The others must see them as examples of the bravely class struggles and learn alot.

It is very simple, to install a new system, first we must format the old system completely and after install the new one.

What is the new system?

To answer this question it is necessary to describe the old system first, then the new system is the opposite side of that.

The current system is old and crashed one, because it keeps 99% of the population under the exploitation and oppression of 1% who are in power.

The current system create crisis and war in the world that destroy the life of millions.

The current system destroy the environment by damaging the green nature and making pollution with military and hazardous atomic activities.

Now, the system that throw out the exploitation and oppression from the life, and profit all equally in a just and fair condition is a new system. Come together to Install it by force!

The system without creating crisis and making war is a new system. Come together to Install it by force!

The system that improve the environment condition by stopping destroying the forests, stopping pollution, stopping military and hazardous atomic activities is a new system. Come together to Install it by force!

**Movement of Afghanistan Oppressed Women - MAOW

Special message

From Movement of Afghanistan Oppressed Women (MAOW) To the oppressed women in the Middle East and North Africa

Oppressed women of the Middle East and North Africa!
Make closer your ranks and continue your battles against the Imperialist and feudalism oppression till the complete falling and destruction of the system.

Oppressed women of the Middle East and North Africa!
Never get tired in continue your freedom way and do not be deceived by your enemies. Oppressed women of Afghanistan and other parts of the world are supporting you. Parties, organizations and revolutionary establishments of the whole worlds support your rightful struggles. These parties and revolutionary establishments are your forever friends and assistants in the freedom way to release all peoples of the world from the existing foul and infelicitious of the imperialism and feudalism.

Oppressed women of the Middle East and North Africa!
Establish your revolutionary organizations as soon as possible, and participate into them in millions. Otherwise, the helm of the situations fall into the hand of villains, those who their reins are controlled from the sources and resources of imperialist forces and once again your enemies domination will be set on you under the imperialist bourgeois democracy, the thing that we have in our country nowadays.

Our country Afghanistan is a territory that in this way has become a place for invasion of imperialist and reactionary and black forces. The existent imperialist and mafia forces in the country made noisy propaganda with showing the participation of some of the bourgeois and reactionist women - women with full of anti-people ideas - in the parts of existent mercenary and anti-people state, based on that, they prepared the women freedom.

These anti-people forces are increasing their illegitimate profit and capital speedily with the cost of destroying our country peoples. Imperialists and dominant reactionaries have made almost our people lifeless with assistance of these mercenary women.

Based on the proletariat historical experiences, in any place that imperialism foot is free there, the peoples and specially the women will never have a good time which this is nothing but even they will have the worst situation.

Afghanistan and Iraq can be two examples from imperialist forces invasion that are under the imperialist bourgeois democracy and imperialist bourgeois human rights and imperialist bourgeois women supporting.

Now the same tragedy is going to be done on the Lybia peoples. Tunisia peoples, Egypt and other parts of the worlds that are under the same conditions must act very consciously, and except the peoples establishments which are risen from their between do not trust to any institution and establishment which are formed by or with assistance of the European and American imperialists and see them as the power levers of the world aggressors.

Oppressed women of the Middle East and North Africa!
Keep away yourself from the imperialist women rights organizations. This organizations are the propagandists and propagator of imperialist bourgeois democracy that comes to the lists for stopping you women.

Imperialist bourgeois democracy, the thing that we have it in our country today. And peoples of our country specially the oppressed women said NO to that with not going to the elections sites broadly.

Oppressed women and men of Afghanistan are abhorrenced of bourgeois democracy extremely. Here, our country peoples both women and men know parliament well. Herein oppressed women and men have a clear knowledge from the three strengths of the state. legislature, executive and judicature of the dominant system.

Herein our peoples are under the most violent and barbaric attacks of imperialists and their full armed mercenary reactionaries.

See the barbaric bombardments of this criminals that how savagely inter our peoples under their houses collapse. Look to the other criminals armed forces that how they have prepared themselves to murder and plunder of our peoples. we recommend you to follow our country news certainly from diferent sources and specially via revolutionary parties, organizations and establishments. You can learn a lot from our situation.

These forces who are governing on us by weapon today whether governmental one or non-governmental one, they are present in your countries too. These forces we say means the forces who are feeded by imperialist sources and they have mafia structures. Now these forces can have religious nature or non-religious nature, there is no difference. This is important that all these are at the service of the world imperialism as peoples enemies and are getting the advantage of governing and being in power from plunderer imperialists by killing peoples.

Now our peoples in spite of existence this much of bloodthirsty forces who have gathered form all around the world for putting them under the yoke, still countinu their struggles variously as their abilities let them against this oppressors of the times with love to their freedom and liberty.

They strike, they protest, they do not participate in the dramatic voting. They emigrate with all difficulties, and with their other and other behaviors they show their abhorrence and hatred from the mercenaries and their lords of the manors.

Peoples of our country Afghanistan tolerate any difficulty and pressure but they never and never accept bourgeois democracy of the imperialists and their mercenaries.

You also the oppressed women of the Middle East and North Africa, who have risen now to smash the power of dominant dictators on yourselves and even you have partly become succeed, Know that, if you do not continue your uprising and if you do not change it to an anti imperialism and anti reactionary revolution and if you do not resist towards changing the system from imperialist bourgeois democracy to the peoples and neo- democracy or be deceived of the imperialists mercenaries, once again you will be seized with the tooth and nail of plunderer imperialists and their mercenaries like us. And that, in a situation much worse from the conditions you had in the past. We, the oppressed peoples of Afghanistan specially the oppressed women of Afghanistan have felt this with our flesh and blood. And everyday, we suffer its pain extremely to the our bone.

The women in our country Afghanistan are so oppressed that even these **dependent on imperialism** media also are obliged to declare it in many cases.

Imperialists bourgeois human rights organizations and imperialists bourgeois women rights organizations and other sources and imperialists media although disregard thousand cases of oppression and refrain from telling them, but due to the oppression extent and severity in the country they are not still able to keep themselves silent about matter of oppression on the women and children. These organizations and media report oppression cases in occasions they are forced. and on their so-called they are informing public, but in this - their public informing - they discuss the case in the way that imperialists foot be free of the matter.

Whereas the main factor of oppression on our oppressed peoples specially women and children are the imperialists aggression and its puppet state and its mercenary reactionaries in fact.

So the Movement of Afghanistan Oppressed Women - MAOW besides having veneration on the struggles of the oppressed women in the Middle East and North Africa, emphasis the need of struggles against the imperialists and existent reactionary forces more than the past. You the Middle East and North Africa oppressed women should beefing up your ranks and come together with your oppressed but revolutionary and combatant men and make yourselves more prepared than beforer by establishment revolutionary organizations to frustrate the imperialists and their mercenaries plots and plans.

With hope for more success and unity of the oppressed women and men of the whole world towards falling down of the system.

Movement of Afghanistan Oppressed Women - MAOW

To the youth against the Fascism and Capitalism

Masses of the world Started the Class War and burning up Imperialism

Nowadays,
No place is safe
Neither here nor there!

Afghanistan, Iraq, Middle East, North Africa and now America and Europe, anti-imperialism and anti-capitalism struggles of the peoples is going to increase much more than the past. Now, a new page of struggle is opened in the confrontation with the imperialists and reactionary regimes. And it is coming of you youth to the battle, you the youth with no jobs and no future. The riots in England, in Rome and other places against the Fascism and Capitalism are the same, and it is a refusal by hundreds thousands of the poor to accept a world where they are drowned in the destitution, under the aggression and oppression. Thousands in England, hundred thousands in Spain and Rome, thousands in America, we in Afghanistan and the others in Iraq, Tunisia, Egypt, Lybia, Greece, Syria, Palestine, . . . are the same. It is not important where we are from, this is important that all of us belong to the one class, and it is working class. the working class that makes all the things but have nothings. Do you know why?

The answer is easy. because the ruling class have seized everything from the working class by seizure the political power and creating all the rules and other codification on it's class gain. It is a universal battle, because the ruling class and the working class are both universal classes. Two universal classes that always are in the battle with each other. And this battle is not just from today. It is coming from the day which class systems formed. and therefore our struggles is a historical battle.

Lets have a short look on the history of our class struggles. Historical researches shows us three class systems:

Slavery, Feudalism and Capitalism.

Slavery

Slavery system was the first class system. In the slavery system the ruling class was formed by the slaveholders and the working class was included of all the slaves.

In the slavery system, slaves were working and making everything but they had nothing just a portion of food only

for being alive to do the next day work for the slaveholder. In the slavery system, slaves were under the hardest exploitation of the slaveholders. slaveholders had the right to whip the slaves, slaveholders had the right to kill the slaves, slaveholders had the right to sell the slaves and etc. But slaves had no rights just one and it was the right to accept all the rights for their lords, slaveholders.

Long after, the slaves grew and grew quantitative and qualitative. So they started to break that only right they had, and rioted against the slaveholders and whole the slavery system, **as you are doing today's against the capitalism, this modern slavery system.**

Finally, Slavery system fell down by the organized struggles and hard battles of the Slaves.

Feudalism

Feudalism is the second class system. In the feudalism the ruling class is formed from the feudals, and the working class including of all the peasants and artisans. Feudals were owners of the lands and peasants were the persons who just worked on the lands.

Therefore in the feudalism the ruling class formed from the feudals and the working class formed from the peasants.

All the products (crops, handicrafts and etc.) in the feudalism system were produced by the working class, peasants and artisans. They were working nights and days all the years and they were making everything, but at the end they had nothing for themselves. Because feudals with political power and with mercenary armies they had, made all the laws and other codifications for their class gains, not for the working class gains. Therefore, in this way they put the working class under the hard exploitation.

But gradually, the peasants and artisans as they grew quantitative and qualitative found themselves unable to tolerate the hard exploitation of the ruling class and therefore they started to disobey and breaking the rules of the feudals. they rioted many times. Each time they rioted they got experiences and day by day they got more experiences till they became experienced to struggle and battle with the feudals and whole ruling class. they established their revolutionary organizations and continued their battles in an organized way. Finally, after many small and big hotwars the working class succeed to defeat the ruling class and it was the time that feudalism fell down. Still in some places of the world feudalism relations are ruling on the masses, and the revolutionists are fighting with.

Capitalism

Capitalism is the third class system. In the capitalism the ruling class is formed from the capitalists, and the working class is formed from all the workers, labourers, farmers, employees and all other working men and women. Capitalists are owner of the banks, lands, hotels, industrial companies, media, commercial companies, and all the positions in the high ranks of the states and government of the countries. All those who are increasing their capitals or getting profit by putting peoples of the world under the oppression and exploitation are members of the ruling class, no difference where they are from.

Working men and women are the persons who are just the owner of their energy and they are selling their energy by working in the unjust and unfair conditions.

Therefore in the capitalism system, the ruling class is owned by the capitalists, and the working class is owned by the working men and women.

All the products and services in the capitalism system are produced by the working class, working men and women. They are working hard and they are making everything, but at the end they have nothing for their own.

Because capitalists with holding the political power and with having the mercenary armies, made all the laws and other codifications for their own class gains, not for the working class gains. Therefore, in this way they put the

working class under the hard exploitation and oppression. In the capitalism system, imperialism is the highest phase of that. Imperialist capitalism is the most aggressive, the most bloodthirsty and the most plunderous and destructive systems.

Now, all of us **99% of the peoples** of the world are under the ruling of the imperialists and their puppet reactionary regims.

They are fighting and attacking on us to divide the world between themselves again and again.

They are using a lot of weapons and chemicals to kill the people everyday in Afghanistan, Iraq, Lybia and etc.

Imperialism is wasting manpower and money alot, and putting peoples under the worst economical conditions by making war around the world.

What goes on?

The answer is easy, the struggles are going on, the class struggles. Because it is the time that members of the working class “masses of the world” have grown quantitative and qualitative and now they knows the facts more than ever and are aware that what is going up and what imperialists are doing.

Therefore they are going to break everythings which brake their growth.

On the other hand, the Capitalism also is not able to keep the masses of the world under the exploitation, aggression and oppression easily anymore. So, it is going to be smashed by the masses uprising more and more nowadays.

What is our responsibility?

As we Reviewed class systems historically we found it unjust and unfair deeply. Therefore the responsibility which comes to us, it is, coming together and establishing revolutionary group even small one to learn the revolution science and use it to organize the people who we are living among them for uprising against the ruling class and call all with each other as 99% of the people of the world to the ruling class strongly, that we, the masses of the world don't want them on the power anymore. We hate their rules. We are going to create our new world. A world without exploitation, aggression and oppression. A world for all, not for white house and white hall and their relatives. **It is our responsibility.**

The Last word!

Today, the world is in the chains of imperialism. All the masses, all the sources and all the places of the world are under the invasion of imperialism. Imperialism is the enemy of the masses. Imperialism kills many of the peoples everyday. So, peoples of the world suffer too much now from current class system Capitalism and Imperialism. There is just one solution way to get free from these much of pains and it is doable only by breaking the chains of Capitalism and Imperialism to release the globe.

People of afghanistan, Iran, Iraq, Tunisia, Egypt, Lybia, Greece, Syria, Palestine, England, . . . as masses of the world burning up Imperialism towards having a new world, a world without imperialists and capitalists and without unjust and unfair condition for living.

Therefore, you youth in Spain, in England, in Rome and other places of the world against the Fascism and Capitalism Strengthen the existent revolutionary movements (Parties, organizations and groups) and organize yourselves more and more to have more power. So, the future is in your hand.

Victory to the struggles of the masses of the world against the Capitalism

Dead to the Imperialism

Long Live the General Strike and Protest Movement of the People against the Capitalists!

Victory to the democratic, anti-imperialism and anti-reactionary struggle of the Oppressed Women of Afghanistan

**Movement of Afghanistan Oppressed Women - MAOW

Uprising in England – Politicians want peace without justice

Taken from Democracy and Class Struggle, by Emma Lewis.

By World People's Resistance Movement (Britain)

The uprising which began on the 6th August represents the rage of the poor against decades of police violence/racism, unemployment, and poverty.

Tottenham has a long history of police killings (Mrs. Aseta Simms, Colin Roach, Mrs. Cynthia Jarrett, Joy Gardener) and struggle against police violence.

On Thursday August 4th, Mark Duggan, a 29 year old father of three was shot by the police. Normally when someone has been killed, the police inform the family first, before the name is made public. This did not happen in this case. On Saturday 6th August the family of Mark Duggan and 300 community members organized a one hour vigil outside the Police station asking for answers to their questions re his death. The vigil started at 5pm. At 9pm the people decided to end the vigil as no police officer was willing to speak to the family. While the crowd dispersed, the police attacked a 16 year old girl, smashed her with riot shields and batons. It was in response to this brutal and savage attack on this young girl, that the young men started to stone police cars and then to torch them.

We now know that Mark's killing was part of a planned operation "Operation Trident" which is directed at "gun crime" in the Black community, and was carried out by CO19, a specialist firearms unit.

So far we have had different stories from the police about the shooting. The IPCC, the Independent Police Complaints Commission, (known in the Black community as the 'Independent Police Cover up Commission') which is NOT Independent, now claims that "we may have inadvertently given misleading information to journalists" One story they gave was that there was an "exchange of fire" They have now admitted that this was not true. The police have no historical record of providing reliable information.

Lies change but the truth remains consistent.

For well over forty years now, the number of deaths in

police custody has averaged one a week. Yet no police officer has been found guilty of murder or has even been charged.

Although the spark for the uprising on the 6th was the murder of Mark Duggan, and the police assault on the 16 year old girl, it is the government's social and economic policies that led to this explosion of violence. It has been brewing for some time. The regime now seeks to shift the blame elsewhere.

Tottenham has the highest level of unemployment in London. Half the borough's children live in poverty. Youth project funding has been slashed by 75% this year, eight of the borough's 13 youth clubs have shut.

There were uprisings here, (as well as in other communities) in 1981 and in 1985. Many people who work, receive such miserly wages that they still have to claim benefits from the State in order to pay their rents. So we as taxpayers are actually subsidizing these criminal employers.

The young people who took to the streets, have grown up in a society where corruption is rampant and where criminality gets rewarded. They have seen bankers blatantly stealing the nation's wealth, billions of pounds have been looted from public funds yet they continue to pay themselves hefty bonuses despite the "debt crisis" and they get away with it. These young people have seen MPs steal our money through fraudulent "expenses" claims and luxury lifestyles. Hospitals and other necessary services are starved of funding, and people die, this is also violence for which the regime is responsible.

No body is prosecuting the bankers for robbing us, or the politicians, Press and Police for corruption.

How can stealing a pair of trainers equate with the billions of pounds stolen by the bankers and politicians, (against whom no charges have been brought) yet these youngsters are being carted off to prison with sentences being meted out that do not reflect the crimes.

England Riots Maps

Decades of unemployment, poverty and 'Stop and Search' (of Black men) has caused these desperately oppressed and brave young people to unite against the criminals in the regime in Whitehall.

The scandals in the Murdoch Press empire highlighted the corruption of the police, this was not news to the Black community which has borne the brunt of police violence/corruption over the years. The newspapers, controlled by the ruling class, were more than willing to slander the poor with demeaning epithets trying to make injustice acceptable and perpetuating racist stereotypes.

The "flog 'em and hang 'em" brigade is calling for more repression, because the actions of the young have undermined the fundamentals of capitalist society by challenging private property- goods and properties were targeted, not people. Much has been made of the looting, but capitalist culture radiates consumerism. Capitalist society flaunts luxury products and luxury lifestyles before these young people, who have no hope of ever attaining these things and this contributes to their alienation. The constant message is you are what you wear, what you drive etc.

Cameron has now appointed someone from the Fourth Reich to lead the Police service, so things can only get worse.

The only two Black MPs in the regime, (for Haringey and Hackney) have been baying for blood just like the fascists. They have been calling for more repression and a curtailment of the civil and human rights of the very people to whom they owe their cushy positions. These MPs are immoral, unscrupulous, despicable and without principles.

The rulers of the society are a bunch of criminals, it is criminal to steal from the public purse and to send armies to other countries to murder and to steal resources. It is criminal to bomb innocent women and children in the name of democracy.

We've had uprisings before. The lesson people need to learn is that the source of their misery is the capitalist system of production. The only way to break this vicious cycle is to organize to end capitalism. We don't have to accept austerity.

Angina Pectoris

Nazim Hikmet

If half my heart is here, doctor,
the other half is in China
with the army flowing
toward the Yellow River.
everyday
doctor! at every dawn
my heart being shot in Greece.
And every night
when prisoners are asleep
my heart rests at a dilapidated house in Istanbul
and after ten years
whatever I can offer to people
is this red apple
and this is, doctor
this is the reason of my angina pectoris
not nicotine, not prison, not arteriosclerosis
I pull over the night from bar backside
under the heaviness of my chest
my heart still, beats with the furthest stars.

Translated by: Faryad on 04.11.2011
